1. RFA-HL-14-026: HHS SBIR RFA-HL-14-026

Release Date: 11-18-2013Open Date: 01-10-2014Due Date: 02-10-2015Close Date: 02-10-2015

Purpose The objective of this Funding Opportunity Announcement (FOA) is to support the development of microfluidic devices to evaluate blood of pediatric/neonatal patients. Devices designed to analyze thrombotic, transfusion, and/or hemostatic conditions of blood are of interest. Many clinical laboratory-based testing procedures require relatively large volumes of blood for analysis. ...

2. RFA-HD-15-023: HHS SBIR RFA-HD-15-023

Release Date: 12-09-2014Open Date: 01-10-2015Due Date: 02-10-2015Close Date: 02-10-2015

This funding opportunity announcement (FOA) solicits Small Business Innovation Research (SBIR) grant applications from small business concerns (SBCs) to propose research to support research to develop 3D printers, polymers, and process specifications to produce premature- and neonatal-specific devices for external use or short-term insertion and implantation into the human body. There is currently ...

3. RFA-HD-15-024: HHS STTR RFA-HD-15-024

Release Date: 12-08-2014Open Date: 01-10-2015Due Date: 02-10-2015Close Date: 02-10-2015

This funding opportunity announcement (FOA) invites Small Business Technology Transfer (STTR) grant applications from small business concerns (SBCs) to propose research to support research to develop 3D printers, polymers, and process specifications to produce premature- and neonatal-specific devices for external use or short-term insertion and implantation into the human body. There is currentl ...

4. T1.01: Affordable Nano/Micro Launch Propulsion Stages

Release Date: 11-14-2014Open Date: 11-14-2014Close Date: 01-28-2015

Lead Center:MSFCParticipating Center(s):LaRC,KSC,GRCAs small satellites have become more capable of performing valuable missions for both government and commercial customers, there has been significant growth in both the quantity and quality of Nano and Micro Satellite missions. Currently these satellites can only be launched affordably as secondary payloads; but the number of these missions has o ...

STTR National Aeronautics and Space Administration

5. T1: Launch Propulsion Systems

Release Date: 11-14-2014Open Date: 11-14-2014Close Date: 01-28-2015

Launch Propulsion Systems reflects a staged development of critical technologies that include both □pull□ technologies that are driven by known short- or long-term agency mission milestones, as well as □push□ technologies that generate new performance or mission capabilities over the next 20 to 25 years. While solid and liquid propulsion systems are reaching the theoretical limits of efficienc ...

STTR National Aeronautics and Space Administration

6. T11.01: Information Technologies for Intelligent and Adaptive Space Robotics

Release Date: 11-14-2014Open Date: 11-14-2014Close Date: 01-28-2015

Lead Center:ARCParticipating Center(s):JSC,JPLThe objective of this subtopic is to develop information technologies that enable robots to better support space exploration. Improving robot information technology (algorithms and software) is critical to improving the capability, flexibility, and performance of future missions. In particular, the NASA "Robotics, Tele-Robotics, and Autonomous Systems" ...

STTR National Aeronautics and Space Administration

7. T11.02: Computational Simulation and Engineering

Release Date: 11-14-2014Open Date: 11-14-2014Close Date: 01-28-2015

Lead Center:JPLComputational OptimizationProposals are solicited for developing numerical methods and tools that enable robust continuous and discrete optimization as well as uncertainty quantification for physics based computational models. There are many different optimization methods and implementations of some of these methods are available in commercial and open-source form. These methods typ ...

STTR National Aeronautics and Space Administration

8. T11: Modeling, Simulation, Information Technology and Processing

Release Date: 11-14-2014Open Date: 11-14-2014Close Date: 01-28-2015

Modeling, Simulation, Information Technology and Processing consists of four technology subareas, including computing, modeling, simulation, and information processing. NASA□s ability to make engineering breakthroughs and scientific discoveries is limited not only by human, robotic, and remotely sensed observation, but also by the ability to transport data and transform the data into scientific a ...

STTR National Aeronautics and Space Administration

9. T12.01: Advanced Structural Health Monitoring

Release Date: 11-14-2014Open Date: 11-14-2014Close Date: 01-28-2015

Lead Center:LaRCParticipating Center(s):JSCThis subtopic seeks new and innovative technologies in structural health monitoring (SHM), integrated vehicle health management (IVHM) systems, their corresponding analysis tools, and smart materials. Advanced structural

composites and sensors with the potential to enable or enhance distributed damage detection for aerospace vehicles and spacecraft are so ...

STTR National Aeronautics and Space Administration

10. T12.02: High Temperature Materials and Sensors for Propulsion Systems

Release Date: 11-14-2014Open Date: 11-14-2014Close Date: 01-28-2015

Lead Center:GRCAdvanced materials, structures and sensors are crosscutting technologies which are essential in the design, development and health maintenance/detection needs of components and subsystems that will be needed in future generations of aeronautics and space propulsion and power systems. Materials will require multiple or tailored functions that are designed to meet specific mission nee ...
